

ARABI ROUND SLINGS ARE CONSTRUCTED OF 100% POLYESTER YARNS.

THE LOAD CARRYING YARNS ARE PROTECTED BY AN INTERNAL RED POLYESTER COVER AND AN OUTER COLOR CODED POLYESTER COVER. THESE COVERS ARE SEAMLESS AND INDEPENDENT OF EACH OTHER (CONTRASTING COLOR FOR INTERNAL COVER IS USED FOR RED ROUND SLINGS).

EACH SLING IS LABELED WITH A HOT BRANDED, LEATHER TAG. THIS TAG CONTAINS LOAD CAPACITIES AND ALL THE INFORMATION REQUIRED BY THE VARIOUS REGULATORY AGENCIES. IN ADDITION, HITCH DIAGRAMS AND DATE MANUFACTURED ARE ALSO INCLUDED. THIS IS CONSIDERED THE BEST SLING TAG IN THE INDUSTRY.

SLEEVES CAN BE PLACED ON THE BODY OF THE SLING SO THAT THEY CAN BE POSITIONED TO THE AREAS WHERE THEY ARE NEEDED. ARABI ROUND SLINGS CAN BE SUPPLIED WITH AN OUTER SLEEVE OF CORDURA FABRIC TO CREATE AN EYE AND EYE SLING.
